Full High Definition Camera

Pelco's Spectra® Pro 4K (2160p) Series provides up to 8 MPx resolution, which is four times the resolution of 1080p. Combined with 20x optical zoom, one single camera can cover a large area with crystal clear detailed information such as a license plate, face, etc. Depending on the imaging scene, the HDR mode makes the darker part of a camera image brighter, and automatically corrects brightness and contrast to show bright parts clearly.

Video Encoding

Spectra Pro 4K Series provides three methods of video encoding: H.265 Main profile, H.264 High/Main/Baseline profiles and MJPEG.

High Resolution Zoom

Spectra Pro 4K provides superior images while maintaining the resolution without degrading image quality, even when magnified. By combining with optical zoom 20x, zoom is achieved up to 30x in 4K and 40x in FHD.

IR Illumination with Lookup

Spectra Pro 4K Series can see in absolute darkness. The infrared illumination (IR) has proportional brightness based upon zoom, creating visible pictures without any light up to 150 m from the camera. The IR wavelength is 850 nm giving an almost undetectable light source in locations where visible light is undesired or light pollution is regulated.

The Pro 4K Series offers a wider tilt range giving the camera the ability to look above the horizon 15 degrees (center of field of view).

VideoXpert™

Embedded Features

Included in all models are built in video analytics (e.g. Sabotage and Simple Motion Detection). Spectra Pro 4K also allows for up to 16 configurable window blanks. White Balance modes including Auto or Manual are available for overcoming difficult lighting conditions day and night. Spectra Pro 4K supports up to 2 TB of onboard local storage (not supplied) that is easily accessible through the ONVIF Profile G protocol or FTP.

Intuitive Design

Spectra Pro 4K Series features the same ease of installation and maintenance that you have come to expect from Spectra. In addition, the top cover is hinged so that after installation on a mount, the wiring connections can be made while the camera weight hangs on the mount.

VMS Integration

Spectra Pro 4K easily connects to Pelco IP and hybrid video systems such as VideoXpert, Endura 2.0 (or later), and Digital Sentry 7.3 (or later). The camera is also compatible with Digital Sentry NVS (DS NVS), a full-featured video management software, which is available as a free download at www.pelco.com. DS NVS includes four free Pelco IP licenses and allows for the management of video from up to 64 cameras.

Pelco endeavors to be the most open and integrated camera provider in the industry and as a part of that effort Spectra Pro 4K is integrated with a long and ever-growing list of 3rd party software and Video Management Systems (VMS).

PELCO'S SMART COMPRESSION TECHNOLOGY

Pelco's Smart Compression Technology lowers bandwidth and storage requirements by up to 70%. Our technology allows the user to make intelligent decisions regarding storage savings and image quality.

Pelco's Smart Compression Technology dynamically analyzes motion occurring within live video in real-time, to intelligently compress the information you don't need, while retaining details with clear quality in the areas that are important in the scene. By enabling Dynamic GOP, an added feature of Smart Compression, the number of I-frames are automatically reduced in scenes with low motion. Based on the complexity of scenes and motion occurring, such as a store room that has limited entry and exit, up to 70% bandwidth savings can be achieved.
